RE: Game Engine Devloper applying for junior devloper role in Game engine departmaent

Dear Recruiter,

I am writing to express my strong interest in the Game Engine Dev at XYZ Game Studio . With a solid background in computer engineering and a passion for game development, I am excited about the opportunity to contribute my technical skills and insights to your esteemed organization.

During my internship at Riot Games in a team of 20, I actively assisted in the development of game features, participated in bug-fixing initiatives, and contributed to optimization tasks.

My project portfolio includes a comprehensive 2D game engine built from scratch, demonstrating my hands-on skills in C++, SDL, and OpenGL. Furthermore, I led the development of an online live streaming platform, showcasing my proficiency in web technologies and database management.

I am eager to bring my passion for game development, technical expertise, and collaborative spirit to XYZ Game Studio. I look forward to the opportunity to discuss how my skills and experiences align with your organization's goals and projects.

Thank you for considering my application. I anticipate the chance to contribute to your dynamic team and be part of the exciting projects ahead.

Sincerely,

Divyam Redkar
